This book is a great introduction into Ba Zi astrology.

This book picks up from where the first one left off. That being said book 2 deals with totally different facets of your natal chart.

This is not something you just read once. At least, not if you're intending to do a bit more with the knowledge of Chinese Destiny Analysis, Paht Chee, Ba Zi, whatever you want to call it.

I found this book to be more detailed, more systematic, more readable, and ultimately more easily understood than Lillian Too's similar work.

There's still a whole lot of info that is bandied around as if the readers knows all about it: turns out the Direct Officer and 7 Killings starts, for example, are part of This is not something you just read once. There's still a whole lot of info that is bandied around as if the readers knows all about it: turns out the Direct Officer and 7 Killings starts, for example, are part of this 10 Gods thingy that will appear in Book 3. (This is Book 2). The whole looking at the ba Zi and determining it's "a very cold chart, it needs fire" is kinda lost on me - perhaps Book 1 tackled that in more detail??

The "cheat sheet" chart at the back of the book is an immensely valuable reference. I plan to photocopy it so that I don't have to keep thumbing to that page of the book. Especially since the last 10 pages or so seem to not be well bound to the book. I *could* return it to amazon.com, I suppose... :p

Anyways, so overall this was worth the price, I think. I just don't feel like shelling out another \$30 for Book 1 just to see if it fills in the blanks for me. Hmmmm, I wonder if the library has this in its system?? :D
